

MUHAMMED

# FASIL PV

SOFTWARE ARCHITECT

## SKILLS

### Technical

Architectural Patterns: Expert in **MVVM** Architecture

Languages: Dart (**Flutter**), JavaScript (**Node.js**), C# (**WPF**), Python (**AI and Machine Learning**)

Frameworks & Libraries: Flutter, Node.js, .NET for WPF, TensorFlow, PyTorch,**Openai Api** Platform

Server Management & Networking: High-availability applications,LAN,Local server

**AI & Machine Learning:** TensorFlow and PyTorch

**IoT Technologies:** Experienced in developing IoT solutions using **Raspberry Pi** and **Arduino** platforms; skilled in integrating IoT applications with Google Firebase for real-time data management and analytics.

Tools & Platforms: Docker, Google Cloud Platform (GCP), AWS, Azure, Git, CI/CD pipelines

### Own Build Tools

JSON to **Image/PDF** Designer custom designer for **Priting/Export**

Web **WhatsApp API** with **AI Bot** Third-party tools

Local Image Generator using **Stable Diffusion**

Local **AI Agents** for Specific Duties **API**

**GTA 5 FiveM** server Development (**Meta** using LUA,NODE.JS,HTML,CSS)

## EXPERIENCE

### Senior Software Architect, and Developer

Screl Info Pvt Ltd - Malappuram, India | UAE Branch  
April 2019 - January 2024

ERP for Trading, Service, and Booking Software: Developed a comprehensive ERP system using Flutter for the frontend and Node.js for the **backend**, incorporating **AI** for advanced data analysis. This versatile system is tailored for a wide range of business types including **retail/wholesale, restaurants, workshops, laundry services, salons**, etc., showcasing the flexibility and scalability of the **MVVM** architecture in handling diverse business requirements. The system's AI components enable insightful analytics and data-driven decision-making, enhancing operational efficiency and customer service across sectors.
