

MUHAMMED FASIL PV

Senior Frontend Developer · AI-enabled Product Builder

Location: Dubai, UAE **Phone:** +971 555923545 **Email:** faztrick@gmail.com

LinkedIn: linkedin.com/in/faztrick **GitHub:** github.com/faztrick **Portfolio:** uaecodes.com

PROFESSIONAL SUMMARY

Results-driven frontend developer with **13+ years** building ERP, QMS, POS and IoT platforms in the GCC. I work across **React + TypeScript**, Flutter, and modern Node.js backends, pairing UI delivery with IoT/MQTT automations and practical AI copilots. I translate complex retail workflows into fast web experiences, build reusable component libraries, and wire CI/CD plus observability so products remain stable post-launch.

I'm comfortable blending React Query data strategies, ML-powered automation, LiveKit/WebRTC support flows, and secure MikroTik + WireGuard meshes. My approach: prototype quickly, then harden with testing (RTL, Cypress, Playwright), performance budgets, accessibility checks, and telemetry.

CORE COMPETENCIES

Frontend Architecture & UI Systems

Component libraries with TypeScript, Storybook, Chromatic, visual regression checks.

State patterns: Redux Toolkit, React Query, Zustand micro-stores, XState for flows.

Design tokens, theming, dark/light, WCAG AA accessibility, RTL readiness.

Performance playbook: virtualization, suspense strategies, code splitting, memoization.

Platform, DevOps & Quality

Node.js/Express APIs, GraphQL, WebSocket, LiveKit WebRTC, TURN/STUN, Nginx reverse proxy.

Docker, GitHub Actions, SWA deployments, Application Insights dashboards, log pipelines.

Testing matrix: Jest + React Testing Library → Cypress/Playwright → Lighthouse budgets.

Secure delivery with MikroTik WireGuard, JWT/OAuth2, secret rotation, environment automation.

AI, Automation & Edge

OpenAI, LangChain, local LLMs (Qwen3) powering contextual copilots and smart forms.

YOLOv8 computer vision, OCR invoices, Whisper ASR, multi-modal prompts for Ops tooling.

ESP32/Raspberry Pi automation, MQTT mesh events, Android AIDL LED/GPIO control.

Business & Domain Depth

Retail ERP/POS + Queue Management for Union Coop, Carrefour, multi-branch service ops.

WhatsApp/Telegram automation, booking engines, delivery routing, CRM sync.

Hybrid analytics (MySQL ↔ Hive) for offline-ready dashboards.

| FEATURED REACT & UI INITIATIVES

- **Operations Control Center** — Next.js dashboard for IdolMEA with reusable components, cached data layers, Tailwind kit, and MQTT overlays for live queue telemetry.
- **IdolQueue (i-QMS)** — Flutter kiosks plus web mission control; offline-first sync, MQTT automation, and branch analytics (Union Coop and Carrefour production rollout).
- **Live Video Support Platform** — LiveKit-powered console, TURN/STUN infra, Nginx TLS offload, and AI summaries feeding customer tickets.
- **Hybrid Sync Engine** — Admin panel to track MySQL ↔ Hive delta replication with alerts and recovery workflows.
- **Self-Checkout AI Kiosk** — Tablet UI supervising YOLO detections, Kotlin AIDL LED controls, and proactive equipment alerts.
- **Domain & DNS Automation Kit** — Web admin for Azure Static Web Apps/App Service custom domains with PowerShell orchestration.

| TECHNICAL STACK (EXPANDED)

Languages: JavaScript (ES2023), TypeScript, Python, Dart, C#, SQL, Bash.

Frontend: React, Next.js, Remix, Flutter Web, WPF, Tailwind, SCSS, CSS Modules.

Backend & APIs: Node.js/Express, FastAPI, Django, .NET, GraphQL, REST, WebSocket, LiveKit, WebRTC, MQTT, Socket.io.

DevOps & Cloud: Docker, Kubernetes, GitHub Actions, Azure Static Web Apps & App Service, AWS (EC2/S3/Lambda), GCP, PM2, Nginx, Application Insights.

Data: MySQL, PostgreSQL, SQL Server, MongoDB, Firebase, Apache Hive, Redis, ObjectBox.

Security & Networking: MikroTik RouterOS, WireGuard, JWT/OAuth2, SSL/TLS, TURN/STUN, VPN mesh automation.

PROFESSIONAL EXPERIENCE

Software Engineer — Frontend & Platform

Aug 2024 – Present

Idol Technology LLC · Dubai, UAE

- Architected IdolIMEA ERP React console layered on Flutter POS terminals; modularized components, set design tokens and responsive grid system.
- Delivered Next.js operations center with live MQTT overlays, React Query caching, and tailwind-themed widgets for Ops, Finance, IoT teams.
- Implemented LiveKit WebRTC support desk plus AI assistant that summarizes calls and pushes tickets to ERP workflows.
- Automated WhatsApp Business + Telegram pipelines for queue alerts and AI chat responses, reducing SLA breaches by 70%.
- Extended React admin to manage YOLO-based theft signals, Android AIDL LED/GPIO states, and override actions per kiosk.
- Shipped MikroTik WireGuard-backed routing + MySQL↔Hive hybrid sync monitors surfaced inside React dashboards.

Stack: React, Next.js, TypeScript, Tailwind, Zustand, React Query, Node.js, LiveKit, MQTT, Docker, Azure, MikroTik, Hive

Senior Software Engineer — UI & AI

Apr 2019 – Jan 2024

Screl Info Pvt Ltd · India / UAE

- Migrated legacy Angular/WPF portals to React + Next.js with shared UI kit, schema-driven forms, and automated testing gates (RTL + Cypress).
- Led SincA ERP feature pods (Flutter mobile + React web) delivering AI dashboards, OCR invoice parsing and predictive KPIs.
- Containerized 15+ microservices, wired GitHub Actions CI/CD, and carved preview environments for every pull request.
- Built WhatsApp/Telegram low-code automation builder surfaced in React admin with templating + analytics.
- Mentored frontend guild on hooks best practices, performance tuning, accessibility, and TypeScript contracts.

Stack: React, Next.js, Redux Toolkit, Cypress, Node.js, Python, TensorFlow, Docker, Kubernetes, Firebase, ESP32, MQTT

Software Developer

Mar 2014 – Mar 2019

Sincap Info Pvt Ltd · Calicut, India

- Built ERP/accounting suites in WPF (C#) with MVVM, later exposing features via PHP/JS portals and React pilot dashboards.
- Introduced REST APIs, caching, and modular UI architecture that reduced delivery time for new customer onboarding.
- Managed SQL Server tuning, automated reporting, and hands-on support for 50+ SME clients.

Stack: WPF, C#, SQL Server, PHP, JavaScript, REST, React pilots, Bootstrap

EDUCATION

Diploma in Computer Engineering

JDT Islam Polytechnic · Calicut, India

June 2010 – March 2013 · Focus on software development, data structures, networks.

CERTIFICATIONS & CONTINUOUS LEARNING

- AWS Certified Solutions Architect (In Progress)
- Microsoft Azure Fundamentals + Application Insights/Static Web Apps practice
- Docker & Kubernetes Deployment · GitHub Actions Advanced CI/CD
- Machine Learning Specialization (Coursera) · Advanced Flutter/React workshops

ADDITIONAL INFORMATION

Location: Dubai, UAE · **Work Authorization:** Valid UAE Work Visa · **Nationality:** Indian · **Driving License:** UAE

Languages: English (Fluent), Malayalam (Native), Hindi (Fluent), Arabic (Basic)

Expertise Areas: React/TypeScript, AI/ML integrations, IoT/Edge orchestration, Live support tooling, Retail tech, Cloud DevOps

Availability: Immediate · **Notice:** 1 Month
