

MUHAMMED FASIL PV

Senior Full-Stack Engineer (React + Node.js) | AI Integration Specialist

Location: Dubai, UAE **Status:** Available Immediately **Phone:** +971 555923545

Email: faztrick@gmail.com **LinkedIn:** linkedin.com/in/faztrick

GitHub: github.com/faztrick **Portfolio:** uaecodes.com

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with **13+ years** of experience designing and delivering scalable enterprise platforms, ERP systems, and AI-powered automation tools. Expert in **React, Node.js, and TypeScript**, with deep expertise in integrating **Generative AI (OpenAI/LangChain)** and **Computer Vision (YOLO)** into production workflows. Proven ability to lead development teams, architect cloud-native solutions (Docker/AWS/Azure), and drive technical innovation.

Innovative software engineer with strong hands-on depth across **AI-driven automation, IoT ecosystems, MVVM architecture**, and **retail technology platforms**. Bridges hardware and software to build secure, real-time, modular systems spanning ERP, POS, QMS, edge devices, and hybrid cloud/offline sync.

Delivers production-ready systems blending **Flutter, Node.js, Python, WPF**, and **Kotlin**, with strong foundations in DevOps, networking, and security across distributed branch environments.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, Flutter, Dart, JavaScript (ES6+), HTML5, CSS3, Tailwind.

Backend: Node.js, Python, C# (.NET), RESTful APIs, GraphQL, Microservices Architecture.

AI & ML: OpenAI API, LangChain, YOLO (Computer Vision), Whisper, TensorFlow, RAG Pipelines.

Databases: MySQL, MongoDB, PostgreSQL, Firebase, Hive (Local-first).

DevOps & Cloud: Docker, Kubernetes, CI/CD (GitHub Actions), AWS, Azure, Nginx, Linux.

IoT & Embedded: ESP32, ESP-S3, Raspberry Pi, Solum ESL, OEPL, MQTT, AIDL IPC.

Networking & Security: MikroTik RouterOS, WireGuard, DHCP, NAT, VLAN, VPN, JWT, OAuth2, HTTPS, SSL/TLS.

Senior Software Engineer

Idol Technology LLC, Dubai, UAE

Aug 2024 – Present

- **Enterprise Architecture:** Architected and led the development of **IdolIMEA ERP**, a comprehensive retail platform integrating POS, Queue Management (QMS), and inventory systems for 50+ branches.
- **AI Integration:** Developed an **AI-powered theft detection system** for self-checkout kiosks using **YOLO** and Python, significantly reducing shrinkage.
- **Backend Performance:** Built high-performance Node.js microservices to handle real-time data synchronization across distributed retail locations.
- **Real-time Systems:** Implemented **MQTT-based automation** for instant notifications and live dashboard updates across web and mobile clients.
- **Hybrid Data Sync:** Engineered a robust offline-first data synchronization engine (MySQL ↔ Hive) to ensure business continuity during network outages.
- **Queue Platform:** Built **IdolQueue (i-QMS)** in Flutter + Node.js with Hive offline sync, MQTT events, and multi-branch dashboards.
- **Network Architecture:** Designed **IdolVPN mesh** using WireGuard for secure multi-branch communication and API routing.
- **Customer Automation:** Integrated WhatsApp/Telegram automation for live queue alerts and service updates.
- **Production Rollout:** Deployed i-QMS to production at **Union Coop** and **Carrefour Al Zahia**, improving throughput and service times.

Senior Software Engineer

Screl Info Pvt Ltd, India / UAE

Apr 2019 – Jan 2024

- **Product Development:** Designed and deployed **SincA ERP**, a multi-module enterprise solution using Flutter and Node.js.
- **AI & Analytics:** Integrated predictive analytics models using Python and TensorFlow to provide business insights and forecasting.
- **DevOps Implementation:** Containerized applications using **Docker** and established CI/CD pipelines, reducing deployment time by 40%.
- **Team Leadership:** Mentored a distributed team of developers, establishing code quality standards and best practices for scalable architecture.
- **Automation Platforms:** Built WhatsApp/Telegram bots for invoice updates, support, and customer interaction.
- **Business Intelligence:** Implemented AI queue prediction, OCR systems, dynamic pricing, and modular API architecture.

Software Developer

Sincap Info Pvt Ltd, India

Mar 2014 – Mar 2019

- **System Development:** Developed core modules for enterprise billing and accounting systems using **C# (WPF)** and **PHP/MySQL**.
- **Optimization:** Refactored legacy codebases to improve UI responsiveness and query performance for large-scale reporting modules.
- **Enterprise Delivery:** Delivered solutions for 50+ enterprise clients with performance-tuned SQL databases and modular reporting systems.

KEY PROJECTS

- **IdolMEA ERP (React, Node.js):** A unified retail management platform handling complex workflows for multi-branch enterprises.
- **AI Job Search Automation Suite (Node.js, Puppeteer):** Built an intelligent agent system that automates job applications on LinkedIn/Indeed using AI for form filling and personalized cover letter generation.
- **AI Queue Agent (Python, LangChain):** An intelligent assistant using LLMs to manage customer queues via voice and text commands.
- **Hybrid Sync Engine (Node.js, MySQL):** Engineered an offline-first data synchronization engine with conflict resolution for distributed retail systems.
- **Vlogfied (Flutter, Firebase):** A social video discovery platform featuring AI-driven content tagging and recommendation algorithms.
- **BookzNow (Flutter, MVVM):** A booking and scheduling platform for service-based businesses with real-time availability management.
- **IdolQueue (Flutter, Node.js, Hive, MQTT):** Smart queue automation platform deployed across retail branches.
- **AI Self-Checkout Kiosk (Android, YOLO, AIDL):** Vision-enabled kiosk with LED and GPIO control for assisted self-checkout.
- **IdolVPN Network (MikroTik, WireGuard):** Secure multi-branch VPN mesh for retail sync and internal routing.
- **ESL Tools (ESP32, MQTT):** Solum/OEPL tag management, flash tools, and controller utilities.
- **Local AI Agents:** Offline and edge AI assistants embedded into retail workflows.
- **Azure Image Server Function:** On-demand image resizing and caching for CV/site assets.
- **Domain & DNS Automation Toolkit:** Multi-domain provisioning and HTTPS enforcement automation.
- **ATS Optimization Pipeline:** Role ranking, targeted outreach generation, and application tracking automation.
- **Hozzo:** Service booking platform with payments, push notifications, and scheduling flows.
- **Delivery Pro:** Logistics and dispatch platform with live driver tracking and route optimization.
- **Real Estate Automation:** Lead intake, CRM sync, and multi-channel outreach automation.

RESEARCH & INNOVATION HIGHLIGHTS

- **AI-Edge Retail Mesh:** Hybrid inference and MQTT layer for low-latency retail automation.
- **Offline-First ERP Engine:** MySQL ↔ Hive replication with delta conflict resolution.
- **LLM Queue Copilot:** LangChain-based ERP assistant for service queue workflows.
- **Retail Vision System:** AI theft detection integrated with edge-device signaling and alerts.

TECHNICAL LEADERSHIP

- Led distributed engineering teams across India and UAE with hybrid CI/CD pipelines.
- Established deployment standards for multi-branch ERP, queue, and device-management systems.
- Conducted mentoring and onboarding on Flutter MVVM, DevOps, and scalable architecture.
- Designed governance for branch sync, cloud rollout, and infrastructure operations.

HARDWARE & EMBEDDED ENGINEERING

- Designed ESP32/S3 tooling for ESL flashing and diagnostics.
- Built UART and HID bridges for barcode scanners and retail peripherals.
- Integrated AIDL IPC between Kotlin and Flutter for LED and GPIO control.
- Configured Raspberry Pi controllers for cameras, sensors, and local automation.

NETWORKING & SECURITY

- Engineered secure WireGuard-based branch VPN meshes on MikroTik hardware.
- Automated NAT, port forwarding, and intranet access flows for distributed deployments.
- Implemented VPN-routed MQTT and device communications across edge networks.
- Managed SSL termination, HTTPS delivery, and firewall isolation for ERP and IoT zones.

AI & LLM PROJECTS

- **AI Queue Agent:** LLM assistant for queue management and scheduling.
- **Retail AI Copilot:** LangChain ERP query assistant embedded in POS and admin workflows.
- **Vision + LLM Fusion:** YOLO object detection plus contextual reporting with LLMs.
- **Local LLM Deployment:** Qwen3, Phi, and Llama variants on edge and local devices.
- **Voice Automation:** Whisper-powered staff voice command and operational workflows.

ACHIEVEMENTS & RECOGNITION

- Showcased self-checkout kiosk and retail AI work at Gitex Dubai 2024.
- Recognized internally for edge AI and automation R&D contributions.
- Featured in community showcases for IoT and AI integration work.

ENTREPRENEURIAL & SIDE PROJECTS

- **BlueBolt Automation:** Smart office and home automation concepts using ESP devices.
- **Stalwart Studio:** Branding and automation experiments using AI marketing tooling.
- **Vlogfied:** AI-tagged restaurant discovery app.
- **BookzNow:** Flutter MVVM booking system with chat-oriented automation.

EDUCATION

Diploma in Computer Engineering

JDT Islam Polytechnic, Calicut, Kerala, India

Jun 2010 - Mar 2013

CERTIFICATIONS & COURSES

- MikroTik RouterOS and WireGuard Advanced Routing.
- Flutter and Dart Advanced.
- LangChain and OpenAI LLM Integration.
- GitHub Copilot for DevOps Automation.
- TensorFlow Developer Bootcamp.

ADDITIONAL INFORMATION

Location: Dubai, UAE

Status: Available Immediately

Nationality: Indian

Visa: Company Visa

Date of Birth: 03 Nov 1991

Languages: English, Hindi, Malayalam

Driving License: Valid UAE License
