React + Flutter

Full-stack product engineering

AI + IoT

Retail and edge systems

PROFESSIONAL SUMMARY

Dubai-based Senior Full-Stack Engineer with **13+ years** delivering production ERP, QMS, POS, retail automation and AI-enabled platforms. Strong across **React, TypeScript, Node.js, Flutter, Python, Docker, MySQL and cloud deployments**, with the ability to move from architecture to rollout and support.

build practical systems for real operations: live dashboards, queue platforms, offline-first sync, WhatsApp/Telegram automation, AI copilots, YOLO vision flows, IoT/MQTT integrations and secure branch networking. My strength is connecting product UI, backend services, infrastructure and edge devices into reliable business workflows.

TARGET ROLES

Senior Software Engineer, Full-Stack Engineer, Backend Engineer, React/Node.js/Flutter Engineer, AI Platform Engineer, Retail Technology Engineer, or solutions-focused product engineering roles in Dubai, Abu Dhabi, and Sharjah.

RECRUITER QUICK MATCH

Full-Stack & Flutter Product Engineering

React/Next.js dashboards, Flutter business apps, Node.js APIs, database-backed workflows and production rollout support.

Strong fit for teams building ERP, POS, QMS, CRM, booking, operations, retail, logistics or internal business platforms.

AI & Automation Delivery

Practical AI features using OpenAI, LangChain-style agents, local LLMs, OCR, Whisper, YOLO vision and workflow automation.

Builds AI tools around business value: support summaries, smart forms, invoice parsing, queue alerts, kiosk intelligence and reporting.

Backend, APIs & Integrations

- REST APIs, Express services, auth flows, WebSocket/real-time events, MQTT messaging, sync engines and third-party integrations.
- Comfortable connecting web/mobile apps with payment, notification, messaging, analytics, hardware and branch-network systems.

Cloud, DevOps & Reliability

- Docker, PM2, Nginx, GitHub Actions, Azure/GCP/AWS hosting, logs, deployment scripts and environment configuration.
- Hands-on with production support, debugging, performance tuning, database optimization and secure branch connectivity.

SELECTED PRODUCT & PLATFORM WORK

- **IdolIMEA ERP:** Retail and service operations platform covering POS, queue management, IoT control, AI reporting, branch workflows and admin dashboards.
- **IdolQueue (i-QMS):** Flutter and web queue-management system with offline sync, MQTT automation, real-time counters and branch-service workflows.
- **Operations Control Center:** React/Next.js dashboard with reusable components, cached data layers, Tailwind UI patterns and live queue telemetry overlays.
- **AI Self-Checkout Kiosk:** YOLO-based detection workflow connected to Android AIDL LED/GPIO controls and kiosk override screens.
- **Hybrid Sync Engine:** MySQL-to-Hive/local-storage synchronization with monitoring views, recovery workflows and branch-resilience support.
- **Local AI Agents:** Internal AI assistants for inventory, support, ERP guidance and store operations using OpenAI/Qwen-style workflows.
- **OpenEPaperLink-WebUI:** Public GitHub project around AI-enhanced OEPL/ESP32 e-paper tooling, relevant to ESL, embedded devices and retail edge workflows.
- **Flutter Thermal Printer Integration:** Public Flutter printer-integration work aligned with POS, kiosk and receipt-printing use cases.

- **Secure Branch Network:** MikroTik and WireGuard routing setup for private API access, branch connectivity and operational telemetry.

TECHNICAL STACK & DELIVERY DETAILS

Languages: JavaScript, TypeScript, Dart, Python, C#, PHP, SQL, Bash/PowerShell.

Frontend: React, Next.js, Flutter Web, Tailwind, SCSS, CSS Modules, responsive dashboards, admin panels, reusable components, forms, tables, charts, data-heavy screens and accessibility-aware UI.

Mobile/Desktop: Flutter MVVM, WPF/.NET MVVM, offline-first apps, local storage, POS/queue/kiosk clients, Android device integration and business workflow screens.

Backend & APIs: Node.js, Express, FastAPI, .NET services, REST, WebSocket, MQTT, JWT/OAuth2 auth, file uploads, notifications and integration APIs.

Data & Sync: MySQL, PostgreSQL, SQL Server, MongoDB, Firebase, Hive, ObjectBox, Redis, indexing, caching, reporting queries, offline sync, replication and recovery workflows.

AI / ML: OpenAI, LangChain-style workflows, Qwen/local LLMs, Whisper, OCR, YOLO, TensorFlow/PyTorch exposure, AI assistants, invoice parsing, vision alerts and automation agents.

IoT / Edge: ESP32, Raspberry Pi, MQTT, Solum/OEPL electronic shelf labels, Android AIDL, LED/GPIO control, kiosk signaling, branch devices and edge-server workflows.

Cloud / DevOps: Docker, Docker Compose, PM2, Nginx, GitHub Actions, Azure Static Web Apps, Azure App Service, AWS, GCP, deployment scripts, environment variables, logging and monitoring.

Security / Networking: HTTPS/TLS, JWT, OAuth2, MikroTik RouterOS, WireGuard, VPN, NAT, DHCP, reverse proxy, secure branch routing and private internal APIs.

Quality: Debugging, browser testing, Playwright/Cypress exposure, API smoke checks, performance tuning, database optimization, production support and release discipline.

PROFESSIONAL EXPERIENCE

Software Engineer — Frontend & Platform

Aug 2024 – Present

Idol Technology LLC · Dubai, UAE

- Mainly implemented IdolMEA ERP and IdolQueue software modules for Carrefour and Union Coop retail/service environments in the UAE.
- Built AI-based self-checkout and QMS applications showcased by Idol at GITEX in 2024 and 2025.
- Delivered platform modules spanning Flutter POS/queue clients, React dashboards, Node.js services and operational admin tools.
- Built live operations views with MQTT overlays, React Query caching and Tailwind-based widgets for queue, finance and IoT teams.
- Built WhatsApp Business and Telegram automation for queue alerts, service notifications and AI-assisted customer responses.
- Extended kiosk/admin tools to manage YOLO signals, Android AIDL LED/GPIO states and manual override actions.
- Supported secure branch communication using MikroTik/WireGuard routing and hybrid MySQL/Hive sync monitoring.

Stack: React, Next.js, TypeScript, Tailwind, Zustand, React Query, Node.js, MQTT, Docker, Azure, MikroTik, Hive

Senior Software Engineer — UI & AI

Apr 2019 – Jan 2024

Screl Info Pvt Ltd · India / UAE

- Designed and delivered SinCA ERP modules across Flutter, web dashboards, Node.js APIs and Python-based AI services.
- Built AI dashboards, OCR invoice parsing and predictive KPI flows for business reporting and operational decision support.
- Containerized service components, wired GitHub Actions CI/CD and improved release consistency across environments.
- Built WhatsApp/Telegram automation screens with templates, analytics and operational notification workflows.
- Mentored developers on MVVM, modular APIs, performance tuning, accessibility and TypeScript contracts.

Stack: Flutter, React, Node.js, Python, TensorFlow, Docker, GitHub Actions, Firebase, ESP32, MQTT

Software Developer

Mar 2014 – Mar 2019

Sincap Info Pvt Ltd · Calicut, India

- Built ERP, accounting, billing and reporting systems in WPF (.NET), PHP and relational databases.
- Introduced REST APIs, caching and modular UI patterns to speed up customer-specific feature delivery.
- Handled SQL Server tuning, automated reporting and hands-on production support for SME business applications.

Stack: WPF, C#, SQL Server, PHP, JavaScript, REST, Bootstrap

EDUCATION

Diploma in Computer Engineering

JDT Islam Polytechnic · Calicut, India

June 2010 – March 2013 · Focus on software development, data structures, networks.

CERTIFICATIONS & CONTINUOUS LEARNING

Azure Static Web Apps, App Service and Application Insights deployment practice
AWS and GCP deployment exposure for application hosting and infrastructure support
Docker, Docker Compose, PM2, Nginx and GitHub Actions delivery workflows
Applied AI/ML learning across LLM workflows, OCR, Whisper, YOLO and Flutter/React product interfaces

ADDITIONAL INFORMATION

Location: Dubai, UAE · **Visa Status:** Visit Visa · **Nationality:** Indian · **Driving License:** UAE
Languages: English, Malayalam, Hindi
Expertise Areas: React/TypeScript, AI/ML integrations, IoT/Edge orchestration, Live support tooling, Retail tech, Cloud DevOps
Availability: Immediate · **Preferred Work Mode:** Onsite or hybrid in Dubai, Abu Dhabi, or Sharjah
